OBJECTIVE

Product Owner with 3+ years of experience leading cross-functional SaaS teams, managing backlogs, and delivering high-impact product features. Skilled at prioritizing work, facilitating agile execution, and translating user feedback into actionable product improvements. Strong background in enterprise environments (telecom, healthcare, SaaS) with focus on adoption, scalability, and measurable business impact. Domain expertise: SaaS, Enterprise B2B, Data & Analytics, AI-assisted products, Telecom & Healthcare.

EXPERIENCE

Deutsche Telekom (Parent company of T-Mobile US) **Spain**
Product Owner / Product Manager **Nov 2023-Present**

- Owned backlog and delivery for a core internal sales automation platform used by 10,000+ users.
- Prioritized features based on user segments, metrics, and business impact, increasing adoption and workflow efficiency.
- Collaborated with engineering on performance optimizations (query tuning, caching), reducing server load by 25% and cutting infrastructure costs by 15%.
- Implemented structured user feedback process, surfacing pain points and driving a 22% increase in satisfaction within 3 months.
- Facilitated cross-functional alignment across Product, Engineering, Sales Ops, and Data teams, delivering high-value features while avoiding a $5M rebuild.

Nice People At Work (SaaS video streaming analytics) **Spain**
Product Manager II **Aug 2022-Jun 2023**

- Managed backlogs and feature delivery for NaLa, an AI-powered video analytics platform used by 70+ B2B customers in 10+ countries.
- Conducted product discovery, customer interviews, and MVP scoping, translating validated insights into production releases.
- Delivered two MVPs focused on audience and ad performance analytics, contributing to 10% ARR growth through improved engagement.
- Coordinated multi-product backlogs (Video Analytics, Ads Analytics, CDN Balancer), balancing short-term customer needs with platform stability.
- Translated complex data outputs into actionable features for non-technical users, improving usability and adoption.

Odysseus Data Services (MedTech data engineering and OHDSI contributor) **USA, remote**
Project Delivery Manager **Feb 2021-May 2022**

- Led delivery of healthcare analytics solutions for large pharmaceutical clients (Merck, Amgen, Johnson & Johnson).
- Owned internal data quality tooling, reducing manual verification costs by $60K per month.
- Improved automated testing and release processes, cutting post-release defects by 30%.
- Worked within the OHDSI open-source ecosystem, gaining exposure to complex data models and regulated environments..

First Line Software (Custom software development and AI solutions) **Russia, remote**
Project Manager **Feb 2020-Feb 2021**

- Delivered Kentico-based platform handling 10x more tenders, reducing task time by 40%.
- Conducted sprint planning, grooming and retrospective to drive continuous product improvement and team engagement

Gazprom Neft (Major producer in oil and gas) **Russia**
Project Manager **Jul 2017-Feb 2020**

- Implemented e-document workflow automation for core operational processes improving process efficiency by 80%
- Mentored and trained 2 colleagues into junior PM roles, who later received ratings of 4.7 and 4.8 out of 5.0

EDUCATION

Peter the Great St. Petersburg Polytechnic University
B.S. in Engineering Management **Russia, Saint-Petersburg**
